Volunteers Needed

Now, the 2023 Lobo Cancer Challenge is an opportunity for everyone to once again run, walk, climb stairs or rode their bikes in a community effort to raise money to support cancer patient care services.

Over the past six years, hundreds of people have run, walked, climbed stairs or rode their bikes in a community effort to raise money to support cancer patient care services.

Learn more about the event and volunteering online. "Do Not Renew Permit Request" form no later than 5 p.m. on July 26. However, if you do not wish to have your permit renewed, you may process your request on the weekend of July 28.

Notice to parking permit holders:

- Over 65% of the construction for the UNM Critical Care Tower has been completed. The progress made thus far demonstrates the steady pace at which the project is progressing. The completion of ceiling closures and the installation of necessary infrastructure in Level 2 is progressing well, with the upper part of the building.

- On Level 1, they are currently working on putting up ceilings and finishing the walls. The basement is nearly complete, and the building is currently being shaped.

- The concerning trees at the Hartung facility have been successfully removed as per the scheduled plan. The decision to remove these trees was necessitated by their close proximity to the building's roof, which had presented a threat to the safety of the construction project.

- The UNM Critical Care Tower, once completed, will significantly expand the infrastructure of the critical care facility.

- The UNM Critical Care Tower, once completed, will significantly expand the infrastructure of the critical care facility.

- The UNM Critical Care Tower, once completed, will significantly expand the infrastructure of the critical care facility.

We encourage you to visit the FM website. There, you will find a list of all current job openings in the department. We welcome you to join us in fostering an environment of mutual recognition and exceptional contributions. Your outstanding work at George Pearl Hall has not gone unnoticed, and we are truly dedicated to recognizing and rewarding it.

A huge Kudos to Irma Gaytan, Custodial Services Coordinator, for her dedicated service and exceptional discipline. Her contributions to the success of the department have been invaluable, and her commitment to excellence is an inspiration to us all.

Congratulations Eric! For his hard work and dedication to the department, Eric has been promoted from the position of Area 3 Electrician II to the position of Area 3 Electrician I.

A huge Kudos to Irma Gaytan, Custodial Services Coordinator, for her dedicated service and exceptional discipline. Her contributions to the success of the department have been invaluable, and her commitment to excellence is an inspiration to us all.

Please visit the FM website for additional options and information. Always be diligent with your safety.
