

# **UNM Space Database FAMIS Cloud**

**Overview**

2020

# Background

- 2006:** Physical Plant Department hired a consultant to perform a Space Capacity Analysis
- 2007:** New “space” software, FAMIS, was approved
- 2009:** FAMIS was fully implemented by Planning and Campus Development – Space Management
- 2012:** Last Space Survey by Finance for the F&A (Indirect Cost Proposal)
- 2015:** Space Management was reorganized to the Physical Plant Department
- 2019:** Space Management was reorganized to Capital & Space Strategies and FAMIS migration to FAMIS Cloud begun
- 2020:** FAMIS Cloud Go-Live

# What is FAMIS Cloud?

- FAMIS stands for Facilities Asset Management Information System
- FAMIS is an Oracle database. This database holds facilities data for all UNM buildings.
- FAMISCAD is a program that creates a direct link between AutoCAD drawings and FAMIS, thus creating a bi-directional link between our AutoCAD building floor plans, and the FAMIS database.
- AutoCAD is the computer aided drafting software that we use to maintain and update the building floor plans of record.

## FAMIS AutoCAD Interface (FAMISCAD)

AutoCAD Floor Plans

The screenshot displays the FAMISCAD interface, which is a bi-directional link between AutoCAD drawings and the FAMIS database. The main window shows a color-coded floor plan of a building. A 'Sample Color Report' is visible, indicating the 'First Floor' of the 'Sample Building'. The interface includes a 'FAMIS Bi' window with a table of room data. The table lists room IDs, names, and coordinates. The 'FAMIS Database' window is also visible, showing a list of rooms and their details.

FAMIS Database

# FAMIS Cloud: Benefits

- FAMIS Cloud **user interface** much more intuitive than FAMIS Classic
- FAMIS Cloud allows you to have access to **view data and floor plans** when you need it.
- FAMIS Cloud uses “Analytics” a reporting tools to produce **Space Reports** when you need them.
- FAMIS Cloud **provides data for administration** for Accreditation, Planning, Budgets and Strategic Initiatives.
- FAMIS Cloud provides **all spacial data for the F&A report** which directly ties to UNM’s Indirect Cost Rate proposal .
- FAMIS Cloud produces the **BR&R report of eligible Instruction & General (I&G) space.**
- FAMIS Cloud **allows UNM to benchmark other Higher Education institutions** by using National space standards (FICM codes) from the US Department of Education.

# Responsibilities

## Departments

Level 5 Orgs must coordinate changes and make updates to their allocated space.

- **Assign Group Members and Contacts**
  - Contact(s): Responsible all allocated space and the Space Survey.
  - Member(s): Assigned to update space
- **Report Changes**
  - Remodel modifications to Space Management
  - Cubical modifications to Space Management
  - Re-organizations
- **Perform Room Updates**
  - Org code & Space Sub-Category
  - Function Code and Accounts
  - Contacts & Employees

## Space Management

Space Management must maintain key base data for use by the Unit.

- **Floor Plans**
  - Update physical changes in building/room
  - Update cubical layouts where required.
- **Base Data**
  - Prep room allocations for Unit updates
    - Building
    - Floor
    - Room
    - Org
- **FAMIS Cloud Help**
- **Archiving** (Allocation Roll-over)

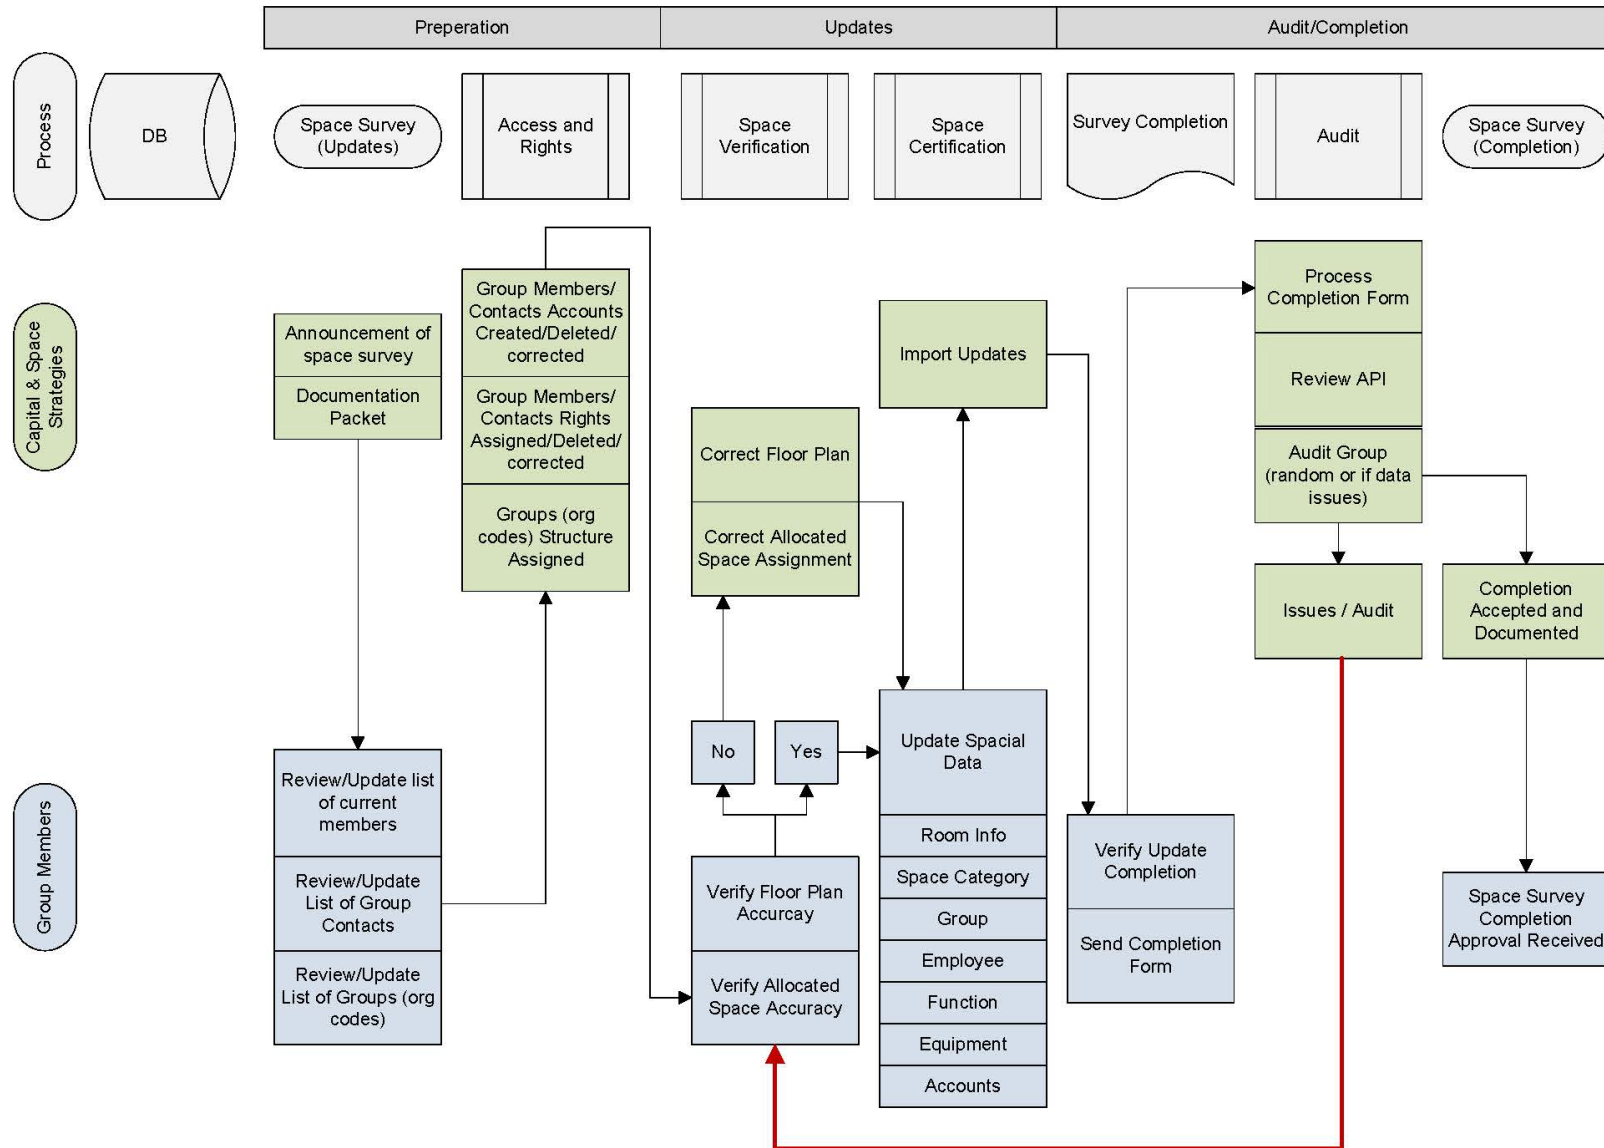

# Space Survey Steps

1. Access and Rights
2. Department Performs Space Survey
  - a) Check Existing Data & Floor Plans
  - b) Coordinate Floor Plan Updates
  - c) Edit/Update Room by Room Data
  - d) Survey Completion Form
3. Space Team Review
  - a) Audit space
  - b) Accept changes submitted
4. Database
  - a) Changes reflected in FAMIS Cloud database and reports
