

Questions/Answers Concerning COVID-19 as Related to UNM Facilities

(updated 3/12/20)

NOTE: UNM Facilities Management (FM) does NOT service all buildings on campus. Some buildings use independent contractors or non-FM staff for custodial and maintenance services. Responses herein relate to facilities serviced by FM. See below for a list of FM serviced buildings.

1. Is the University changing the way it cleans its environments as a result of COVID - 19?

Yes. Custodial crews have established procedures for cleaning and sanitizing facilities, including frequently used surfaces such as doorknobs, counter tops, elevators and light switches which are addressed on a daily basis.

2. Is the University assuring that soap and sanitizer is available?

Yes. Facilities Management has sufficient product amounts stored to replenish these items in restrooms and is checking use levels throughout the day.

3. Does the University have enough paper products such as toilet paper and paper towels?

Yes. The University has stock material for approximately two months on hand. Our management is working with our vendors to acquire more product to replenish the consumed product.

4. What are other different applications the University is implementing to address improved cleaning?

Facilities Management has equipment that is being deployed to all classrooms, conference rooms and other critical areas as priorities on a rotational basis that emits a sanitizer that disinfects surfaces such as walls, desks and furnishings. The sanitizer is safe on paper and other materials such as fabric. Other spaces are being addressed via work order request.

5. Is the University training its staff on what to do to minimize the spread of COVID-19?

Yes. Crews are trained to perform a Level 1 Cleaning Protocol and are being informed of the increased level of concern for both their work and personal health.

6. Does the University have a deep cleaning process it uses in acute circumstances?

Yes. This process is limited as it is a highly intricate exercise. But, if needed, it can be deployed.

7. Will rental events continue in UNM facilities?

The University is working closely with organizations planning to rent our facilities for events. We are providing them guidance on infection control procedures and following the above cleaning procedures. We are also closely monitoring CDC and DOH advice regarding large events.

FM Serviced Buildings
